Patient: Satyam
Age: 20
Phone: 8591891441

Consultation Summary

Chief Complaint: Chest pain since last night, associated with mild shortness of breath and discomfort on deep breathing.

Diagnosis / Voice-to-text Notes: Patient reports central chest discomfort for the past 8 hours. Pain is mild to moderate, non-radiating, and increases slightly with physical activity. Mild shortness of breath present. No history of fever, trauma, or palpitations. Vitals stable at present. Possible musculoskeletal chest pain/gastritis; cardiac causes to be ruled out if symptoms persist or worsen. Advised rest, hydration, and medication.

Follow-up Instructions: Avoid heavy physical activity and spicy food. Take medications as prescribed. Seek immediate medical attention if severe chest pain, sweating, dizziness, or breathing difficulty develops.

Prescription

1. Pantoprazole 40mg

Dosage: 1 tablet | Frequency: Once daily before breakfast | Duration: 5 days
